

# TLI10107 Certificate I in Transport and Logistics (Warehousing and Storage)

## Rationale:

A general qualification for the Warehousing and Storage Industry. Successful completion will require competency in units that relate to work defined as aligned at AQF Level 1. Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

## Requirements for completion of the qualification:

A successful assessment outcome for a total **7 units** aligned at AQF 1 comprising:  
at least 5 units and up to 7 units from those listed below  
up to 2 suitable units drawn with appropriate contextualisation from either other Transport and Logistics Certificate I qualifications, or other relevant endorsed Training Packages.

Units can be packaged together to meet the specific basic operational needs of occupations while also providing options for multi-skilling. Importantly, the flexibility of packaging with the qualification framework must be considered within the responsibility of individuals, enterprises and/or registered training organizations to package units to meet the legislative requirements and/or industry codes of practice necessary at the occupational levels. Units are discrete from each other, however, units may be clustered and delivered and/or assessed concurrently and/or holistically.
